PATIENT PAYMENTS

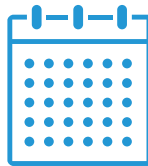

Faster Payments. Fewer Follow-Ups.

Our integrated credit card processing solution helps you boost patient billing efficiency and effectiveness, so you can capture more revenue with less effort.

PROCESS PATIENT PAYMENTS MORE EFFICIENTLY

Capture patient payment details more quickly and accurately with integrated credit card readers. And, when you're ready to charge a card, complete the process in a few simple steps directly within the CareCloud system.

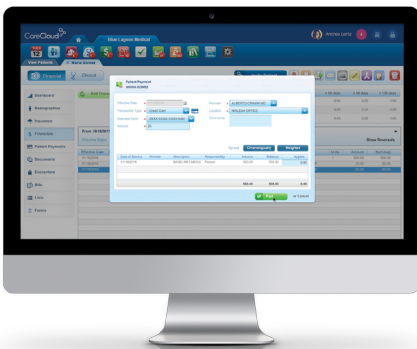

OFFER GREATER PAYMENT FLEXIBILITY TO PATIENTS

The functionality to set up and manage payment plans within the CareCloud system makes it easy to offer flexible payment options to your patients. You'll enhance your patient relationships, while reducing write-offs for your practice.

IMPROVE PATIENT BILLING EFFECTIVENESS

With the ability to develop payment plans for patients and charge credit cards on file, you avoid key barriers to securing patient payments reliably. Plus, you'll reduce the time your practice spends chasing patient balances.

- All features built into CareCloud Central, our cloud-based practice management solution.
- SwervePay, our partner, provides the payment gateway services, but you retain the flexibility to keep an existing vendor for the merchant processing component if necessary.
- Simple flat fee per transaction (after purchase of card readers).
